

## Our direct approach to doing business

A long term, collaboration focused on innovation, dependability and efficiency to make your business stronger and more profitable.

## Consolidated Cooling A Competitive Edge

Berg Chilling Systems will generate more profit for your business through the efficient use of energy, equipment, facilities and manpower.

- *increase efficiency*
- *minimize maintenance*
- *reduce power consumption*
- *built in redundancy protection*
- *no down time*
- *environmentally positive solutions*

# Engineering cold is the big idea.

Eco-positive, thermal management solutions

**BERG**  
Chilling Systems Inc.

# Over 40 Years of Innovation and Dependability

Since 1972, Berg Chilling Systems Inc. has built an international reputation for designing, manufacturing, installing and servicing industrial process chillers and cooling systems to exacting specifications and standards. Our collaborative approach produces engineered innovations that consistently deliver improved operational competitiveness.

## Highest standards and innovative solutions

Berg uses a cross-functional team approach to problem solving. This is particularly effective when unique, challenging and specialized solutions are required.

Our operations management system is ISO 9001:2000 compliant and has been audited and registered by Intertek Group – Global testing, inspection and certification services. We design and manufacture our system solutions in accordance with CSA B51 and B52 and ASME B31.1 and B31.5 and have been audited and certified by TSSA, Technical Safety and Standards Authority.

ISO9001: 2000 Cert #: 5027; CSA Cert #: 1109085(LR111286);  
TSSA Cert #: QA01827

## Proven and trusted worldwide

Berg has designed and installed sophisticated chilling solutions internationally for industries including Aerospace, Automotive, Bio-Energy, Chemical/Petro-Chemical, Environmental Testing, Food and Beverage, Marine, Mining, Pharmaceutical and Plastics.

From non-descript environmental classifications to Class 1 Division 1 Hazardous, the company's innovative solutions have spanned chillers and pumping systems, cooling towers, fluid cooler systems, temperature control systems, de-humidifier systems and industrial icemakers.
