

Expert chilling solutions for marine applications.

When you need a seaworthy cooling solution, you want it to be heavy-duty, well-designed and cost-effective... with all the right features for your application.

We can deliver what you need. For over 40 years, Berg has provided industrial process temperature control solutions with chilling, pumping and freezing equipment to maintain optimal environments and living conditions for the offshore, marine and national defence sectors, including oil rigs, shipyards and coast guard, military/naval, fishing and research vessels worldwide.

MORE THAN 40 YEARS OF INNOVATION AND DEPENDABILITY.

We know the ropes.

Berg has a strong background in providing successful chilling solutions for marine and off-shore applications. We are experts at designing and installing rugged, long lasting, seaworthy and compact skid-mounted systems that fit into tight spaces yet are easy to maintain.

Engineering cold is the big idea.

Berg uses conventional and new cooling technologies to provide marine solutions, including refrigeration systems for domestic and cargo walk-in coolers and freezers, refrigeration equipment for fish holds, chillers for HVAC applications, temperature control units for dive chambers, deionized water chilling and circulating units for submarines, and cooling systems for sensitive and sophisticated onboard electronic equipment.

Shipshape solutions.

With fewer moving parts and better engineering, rugged and reliable Berg solutions do an exceptional job, with less maintenance and a lower cost of ownership. Their quality is guaranteed.

Berg marine refrigeration solutions can be produced to meet the stringent requirements of:

- *Lloyds of London*
- *Bureau of Veritas of France*
- *DNV GL*
- *American Bureau of Shipping*
- *U.S. Coast Guard*
- *Canadian Coast Guard*
- *Canadian Steamship Inspection*

Delivering superior value through factory-tested, on-time and pre-packaged solutions from a well-equipped North American manufacturing facility.

Smooth sailing ahead.

High-quality Berg marine solutions are custom designed, manufactured and tested at our facility to conform to your exacting standards, particular needs and specific operating conditions, so you have the precise solution you need with no extraneous options, parts or worries. Then they're factory skid-mounted to fit onto any container or truck.
