

Project:
Military Vessel Electronics Cooling

Client: ELTA Systems Ltd.

Year: 2019

Solution: Supply of One
Temperature Control Unit shipped
to Busan

Features:

- One Temperature Control Units
- Alfa Laval Stainless Steel Nickel Brazed Plate Heat Exchanger with Inlet
- Strainer
- Expansion tank
- Glycol circulating pump and process circulating pump
- 3-way modulating temperature control valve
- Pressure relief valve

Highlights:

-  Custom Engineered
-  Factory Tested
-  PLC Control
-  Touch Screen HMI

Supply of One indoor Temperature Control Unit for a custom designed liquid to liquid cooling system. Scope of supply included alfa laval stainless steel nickel brazed plate heat exchanger with inlet strainer, expansion tank, glycol circulating pump and process circulating pump, 3-way modulating temperature control valve, pressure relief valve, and factory tested.
