Project:
Chilled Water Free Cooling
System

Client: Ice River Springs
Year: 2023

Solution: Supply of Chilled
Water Tower Tank for a plastic
production line

Features:

- Chilled Water Tower Tank
- Reservoir skid package
- Two process pumps
- Double wall plate and frame gasketed heat exchanger
- One process return line
- Two non-fused pump motor external disconnects factory installed
- Full flow "Y" Strainer
- One side stream cartridge filter
- Electrical control panel
- Training

Highlights:

-  Custom Engineered
-  Start-up
-  Installation
-  Water-cooled
-  PLC System
-  Touch Screen HMI
-  Factory-tested

Supply of Chilled Water Free Cooling System for a plastic production line. Scope of work included: Chilled Water Tower Tank, reservoir skid package, two process pumps, Double wall plate and frame gasketed heat exchanger, one process return line, two non-fused pump motor external disconnects factory installed, full flow "Y" Strainer, one side stream cartridge filter, electrical control panel, centralized PLC System, Touch Screen HMI, Start-up, installation, training, factory-tested.
